Glastender®

COFFEE DISPENSING COOLER

Features

Space-maximizing 20″ cooler for dispensing coffee on draft. One or two faucet tower options for serving cold brew still, on nitro, or both.

Sustaining Decadence

Stainless steel faucets and shanks are included with the C1SB20-CD to preserve the intended flavors and nuances of coffee.

Smooth & Refreshing

This cooler can be configured with a 1″ finished top, low-pressure wall- or tank-mount gas regulator, gas manifold, gas tubing, and beverage tubing. The ordering process is a little quicker and smoother when only fun finishes are left to be determined.
