

Glastender®

GW24 GLASSWASHER

Features

As long as a bartender is washing glassware by hand, they are unable to fulfill customer drink orders. The GW24 rotary glasswasher features a cool rinse cycle so glassware can be moved back into the workflow as quickly and efficiently as possible.

Blends seamlessly with adjacent underbar.

Redefining the Rotary Glasswasher

The GW24 has a unique design which combines the reasonable consumption of water and chemicals of a fill and dump glasswasher with the convenient operating features of a rotary glasswasher.

Sliding cover prevents water and steam from escaping during operation and reduces operating noise. Additionally, the cold water rinse eliminates steam billowing out at the end of the wash cycle.

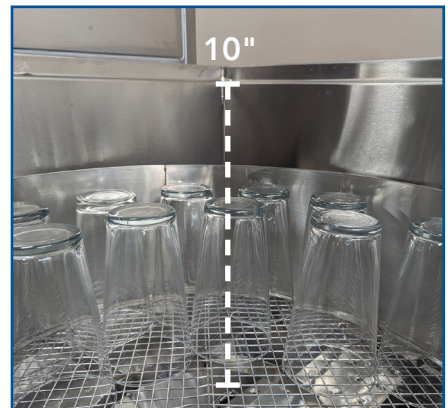

Sensible Design Features

10" clearance height provides ample space for glassware. Perforated drainboard top provides integrated glassware landing area. Drainboard top and glasswasher cover can be easily removed for cleaning.

Compact 24" by 24" footprint. Simple push-button operation. Unit plugs into a standard 120V electrical outlet for straightforward installation and greater accessibility.

Increased Productivity

In a single 2-minute, 15-second cycle, the GW24 fits 24 standard pint glasses, undoubtedly handling the output of multiple bartenders.

Accessories

- Slide-out chemical bottle rack
- Quarter rack stemware divider
- Clip-on wet waste and backsplash
